

Full Stack Final Project

Front-end

Code your website using React.js and the provided Figma UI design.

[*\(Click Here To See Design\)*](#)

The required pages are:

- Home Page (any 2 or 3 sections from the design)
- About Us
- Our Menu
- Book A Table
- Order Online
- Login
- Register
- Profile Page
- Admin Panel

Front-end Notes:

- Use React.js for all components and pages.
- Use React Router for navigation between pages.
- Use CSS Modules for styling.
- Use Axios to connect with the backend API.

Back-end

After implementing your database schema, complete the following functionalities:

1. Login & Register

- There are two types of users:
- - Normal users
- - Admins

2. Our Menu

- Admin can:
- - Add new menu items.
- - Delete existing items.
- - Update menu items from the admin panel.
- Each item should include: Name, Description, Price, Category, Image.
- Normal users can:
- - View the menu.

- - Add items to their cart for online ordering.

3. Book A Table

- Only logged-in users can make a table booking.
- When a booking is made:
 - - Admin receives the request in the admin panel.
 - - Admin can confirm or reject the booking.
- Once confirmed or rejected:
 - - User receives a notification about the status.
- User has a 'My Bookings' page showing: Previous bookings, Current bookings, and their status (Accepted/Rejected).

4. Order Online

- Logged-in users can place an online order from the 'Our Menu' page.
- Users can: Add items to cart, Proceed to checkout, Enter delivery details (address, phone, notes), Choose a payment method (Cash on Delivery / Card).
- Orders are saved in the database with the default status 'Pending'.
- Admin can: View all online orders, Update order status (Accepted, In Progress, Delivered, Rejected).
- Users receive notifications when their order status changes.
- Profile Page includes 'My Orders' section showing all past and current orders.

5. Profile Page

- Logged-in users can:
 - - View and update profile details (name, phone, password, etc.).
 - - View both My Bookings and My Orders with their statuses.

6. Admin Panel Pages

- Admin panel includes:
 - - View Users → List all users and their roles.
 - - View Table Bookings → Accept or reject bookings.
 - - View Online Orders → Manage user orders and update status.
 - - Manage Menu Items → Add, update, or delete menu items.
